EXPERIENCE

Optum Health Care, Remote — *Machine Learning Engineer*

March 2022 - PRESENT

Developing predictive models while adhering to strict data privacy regulations.

Work with predictive models using deep learning algorithms and natural language processing.

Assisted with the implementation of the CI/CD pipeline by creating GitHub actions for the team to automate builds, testing, and deployment processes.

Stack includes Python, Pandas, Pyspark, Scikit-Learn, TensorFlow, Vespa, and Databricks.

Maintained and added new features to a dynamic web app and often added personal improvements to the UI which were regularly approved by the UI/UX team.

Stack included Java, Spring, RESTful API, GitHub Actions, Maven, SQL, JQuery, JavaScript, HTML, CSS, and Struts.

MediaRif, UT — *Full Stack Developer*

March 2019 - March 2020

Integrated RESTful API endpoints into various client apps, allowing for seamless communication between the two systems.

Optimized web performance by reducing image size, minifying JavaScript and CSS files, and improving page load times, resulting in an increase in website speed and user engagement.

Stack included Java, JSP, C#, .NET, Python, Pandas, React, TypeScript, JavaScript, HTML, CSS, Git, RESTful API, and SQL.

MotionSlice, UT — *Full Stack Developer*

March 2017 - March 2019

Designed and implemented responsive user interfaces using React, HTML, CSS, JavaScript, JQuery, Bootstrap, etc. to ensure a seamless user experience across different devices and screen sizes.

Designed and implemented integrations between multiple systems, including third-party APIs and databases, using modern integration frameworks and technologies.

Stack included Java, C#, .NET, Python, Bash, React, TypeScript, Angular, JavaScript, JQuery, HTML, CSS, Git, RESTful API, and SQL.
